

RoleRocket AI - Institution Admin Guide

Audience: Schools, universities, training providers, workforce teams.

Goal: Explain exactly what institutions must do from signup to active cohort management.

Last updated: April 30, 2026

1) Yes, Institutions Must Sign Up First

Before students can be tracked, an institution admin account must be created. Cohort Manager access is restricted to accountType = institution.

- Institution admin signs up first.
- Institution name is saved on that admin profile.
- Students are linked to this institution during signup using the same institution name or invite link.

2) Institution Admin Signup Steps

- Open signup page as the institution admin.
- Choose/create institution account type.
- Enter institution name exactly as it should appear for students.
- Complete signup and log in.
- Open Cohort Manager from navigation.

Tip: Keep one canonical institution name format (for example, "UWI Mona") and use it everywhere.

3) First-Time Institution Setup in Cohort Manager

- Use Copy Invite Link in Overview to get your institution-specific signup URL.
- Use Open Setup Wizard for guided steps.
- Share invite link to students, faculty, and onboarding channels.

4) What Students Must Do After Signup

- Students sign up through the institution invite link.
- Students complete at least one activity (resume, job search, interview assist, or alerts).
- Their usage then appears in cohort stats/interventions.

5) Daily / Weekly Institution Workflow

- Review Overview metrics and at-risk cards.
- Use Interventions tab to copy email lists by risk category.
- Use Students tab filters and CSV export for advising and reporting.
- Track movement from free/inactive to active/subscribed over time.

6) Suggested Launch Sequence for Institutions

- Day 1: Admin signup + configure institution identity + send invite link.
- Day 2-3: Verify first student signups and first tool usage.
- Week 1: Run first intervention outreach using at-risk lists.
- Week 2+: Establish recurring weekly cohort review cadence.

7) Who Needs Which Guide?

- Institution Admin Guide: For staff/faculty/administrators (this document).

- Cohort Manager Guide: For operational dashboard use and student onboarding messaging.
- Optional Student Quickstart: For learners only (signup + first actions).

8) Ready-to-Send Admin Message

"Institution admins must complete setup first. After your institution account is active in Cohort Manager, share your invite link with students. Students who sign up through that link and use at least one RoleRocket tool will appear in your cohort dashboard for tracking and interventions."

End of guide.
